

ENVIRONMENTAL POLICY

The aim of this Environmental Policy is to ensure that Tegrel fulfils its legal and moral obligations as set out in all relevant legislation.

We aim to:

- Reduce pollution, emissions and waste to levels that reduce impacts on the environment.
- Comply with legislation, and continually improve our performance against codes, consents and directives issued as local, national and European directives
- Execute operational emergencies that may impact on the environment
- Operate in a socially responsible manner
- Manage waste generated from our business according to principles of reduction, reuse and recycling
- Reduce, where possible, our consumption of resources and improve efficiency where resources are used
- Ensure environmental considerations are given in the purchase of goods and services

To achieve our aims we will:

- Operate a management system across all business functions that conforms to the requirements of BS EN ISO 14001:2004 and to attaining the highest possible standards of Environmental, Health and Safety and Quality performance
- Apply strict environmental controls throughout our business
- Seek to design, operate and maintain our equipment to the highest possible standards in order to meet our environmental objectives
- Implement new technology to improve working practices
- Set and monitor key objectives for our environmental performance
- Raise awareness, encourage participation and train employees in environmental matters
- Communicate environmental aims and objectives to employees and external stakeholders
- Review our Environmental Policy regularly

W B Hamilton
